

Creating a Streamspin Service

dat5 Autumn 2007

Requirements

- Goal: Create a Streamspin service that can be put in the service directory and used by others.
- Present the service and how it was developed to a knowledgeable audience (your peers).

Presentation of the Service

- Demo how the new service works
 - What is the benefit for the users?
- List how the service has been developed
 - What was easy?
 - What was hard (what was impossible)?
- How can the Streamspin platform be improved
 - Adjustments to existing components
 - New components
- 22,5 minutes presentation

Hardware and Testing

- Hardware
 - We have two PDA phones that you can borrow
- Testing
 - Ask the neighbor group to try out your new service and provide you feedback
